

-Java

1. 

```
try {
    doSomething();
} catch (Exception e) {
    FineLoggerFactory.getLogger().error(e.getMessage, e);
}
```

```
try {
    doSomething();
} catch (Exception e) {
    e.printStackTrace();
}
```

2.  INFODEBUG

```
FineLoggerFactory.getLogger().info("Hello, I am {}. ", "test"); // "Hello, I am test."
FineLoggerFactory.getLogger().debug("Hello, I am {}, it is a {}. ", "test", "sheep"); // "Hello, I am test, it is a sheep."
```

3.  ignore

```
try {
    doSomething();
} catch (Exception ignore) {

}
```
